RUNTAO XUE

Mathematics · Computer Science · Biostatistics
Phone: 0780431664 · Gender: Male · Born: 11 October 2000
Email (preferred): runtao.xue1011@gmail.com
Personal website: xue32613731.github.io
Languages: Chinese, English, French

PROFILE

Master's student in Mathematical Engineering and Biostatistics at Université Paris Cité, with a dual academic background in mathematics and computer science. Strong logical and spatial reasoning, with an aptitude for abstract modelling and complex problem analysis. Rigorous and systematic approach.

EDUCATION

Université Paris Cité, France

2025–2027 Master's in Mathematical Engineering and Biostatistics (M1–M2)

2022–2025 Double Bachelor's in Mathematics and Applications / Computer Science and Applications (L1–L3)

RESEARCH EXPERIENCE & PROJECTS

August 2026 — Robotics and Embodied AI Internship (1 month)

Robotics Institute, Zhejiang University, China

Independently studied and assembled a robotic arm. Contributed to a team project developing a pool-playing robot. Attended the World Robot Expo to explore recent advances and future directions in robotics.

July 2026 — Drug Research Internship (1 month)

Institute for Intelligent Innovative Drug Research, Zhejiang University, China

Contributed to an exploratory study to infer upstream regulatory target genes from RNA gene expression data.

2024 — Criminal Recidivism Rate Prediction Project (6 months)

Team research project using US crime data. Contributed to modelling (logistic regression, LASSO, random forest) and report writing (literature review, introduction and conclusion).

TECHNICAL SKILLS

Programming languages: Python, R, Java, C, SQL
Development: web development, software engineering

KEY COURSEWORK

Statistics: probability, linear models, time series, nonparametric statistics, survival analysis

Data science: machine learning, deep learning, Big Data

Mathematics and modelling: algebra, numerical analysis, optimisation, differential models, stochastic algorithms, deterministic modelling

Biostatistics and epidemiology: health data statistics, statistical genetics and genomics, epidemic modelling

OTHER EXPERIENCE

2022–2025: Strategy game guide creator (10K+ followers). Wrote guides, analysed game mechanics and collaborated with the game's official team.

2018–2019: Conducted research on cancer immunotherapy; wrote and published an article in the Chinese national journal Contemporary Chemical Research.
